## MEET MAXFlow

Tired of Tracking Workflows  
Processes in Excel?

The No Code Solution Built for Mortgage Servicers

Mortgage servicers know that managing due diligence, quality control, trailing docs and collateral gathering in spreadsheets is a tedious and error-prone process. That's why we built MAXFlow - an intuitive no-code platform designed specifically for servicer workflows

# SERVICERS LOVE MAXFlow

With MAXFlow, you can

- Easily set up rules-based workflows to **route documents, tasks, and custom forms** to the right people and systems
- Build customized letter templates that populate data automatically
- Provide a **platform for your BPO** partners to work in
- Control their **Quality Control** process
- Get alerts for key dates, deadlines, and quality control checks
- Maintain a **centralized document repository** integrated with workflows
- Provide **transparency into workload**, productivity, and service level agreements
- Configure the solution **without IT** help using an intuitive drag-and-drop interface
- Setup automatic alerts and triggers to improve process efficiency

MAXFlow integrates seamlessly with your other processes and replaces makeshift Excel-based processes with robust workflow automation. Rapidly implement next-generation operating efficiency with MAXFlow's flexible no code platform.
